**FINAL REJECTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Lines 8-10 of claim 1 should be amended as follows: belt at the ~~lower~~ bottom edge of the glass sheet arrangement and at least one seal beside each of the upright
4. Claim 24 recites the limitation "the geometric angle" in line 1. There is insufficient antecedent basis for this limitation in the claim. The word "geometric" should be deleted.
5. Line 6 of claim 29 should read: "near the lower edges of the plates".

1. Claims 1-50 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The closest prior is Lisec (US 5676782, cited in IDS). Lisec discloses a method and device for assembly insulating glass panes. With respect to claim 1, Lisec discloses all of the limitations of the claim with the exception of the limitation requiring: "wherein one of the two glass sheets is held at a spacing from the belt during introduction of the

gas different from air and that the gas different from air is introduced into the chamber through a gap between the belt and the lower edge of said one glass sheet while the latter is kept in spaced arrangement." Nothing in the prior art discloses such a requirement nor does any prior art provide any disclosure that would motivate one of ordinary skill in the art to modify the method of Lisec in order to make up for the deficiencies of Lisec's disclosure. As to claim 29, the reference fails to disclose a device wherein "means are provided for supplying the gas different from air through the gap between the belt and the lower edge of the glass sheet held in the spaced position."

### ***Conclusion***

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
